

# NDIS Paediatric Therapy Groups

Our allied health team provide a range of therapy groups for children who need help with language and motor skills.

They can also help children with social skills such as engaging in conversations, following instructions and interacting with other children.

Groups include (but are not limited to):

- **Active Lorikeets:** pre-school program focusing on language and handwriting skills for 4 - 6-year-olds.
- **Little Wrens:** Group therapy program for children attending child care, expanding their speech, language and fine motor skills.
- **Lyrebirds:** speech therapy group for preschool-aged children with mild speech difficulties.
- **Moving Meerkats:** program focusing on gross motor skills for children aged 3 - 5.

Individual and small group therapy sessions are available based on your child's needs.

## Why GLCH

- ✓ We have more than 48 years of **local** health experience
- ✓ We provide high quality, accessible services that support people in our communities to **live well**
- ✓ We have staff with the expertise and knowledge to help you achieve your goals
